Pharmaceutical and Healthcare Logistics

Dedicated to Helping You Save Lives

It can be a matter of life or death. Timeliness and safety is everything in the pharmaceutical and healthcare industry. You need a reliable logistics partner who takes utmost care when it comes to handling sensitive medical devices, modern high tech appliances and healthcare products.

Our philosophy is 'Handle with care'. With a commitment to achieving the highest safety standards and adhering to strict regulatory requirements throughout the supply chain, Kerry Logistics understands the critical demands in your industry where precious lives are involved.

Best Practice and Continuous Improvement

Our innovations and best practice in logistics make sure your pharmaceutical products and medical devices are stored and distributed in prime condition every time.

Expertise

Our global team with the knowledge and expertise ensure your products are handled with care and available to your customers 24 hours a day.

SOP

We exercise a strict SOP for each customer to achieve stringent company and government standards.

Measures

We continually evaluate our performance through stringent quality control and regular inspections.

Pharmaceutical & Healthcare Sectors

With decades of global expertise in fulfilling all applicable regulatory standards, Kerry Logistics offers highly specialised services and solutions to major healthcare sectors:

- OTC
- Vaccine and blood serum
- Medical equipment
- Health supplements

Cold Chain Logistics Management

Here at Kerry Logistics, we practise complete cold chain integrity. Your pharmaceutical products stay at optimum temperatures along the supply chain through strict SOP execution and best practices.

- Multi-temperature solutions from deep frozen, frozen to chilled, air-conditioned to ambient
- Temperature and humidity control and monitoring around the clock
- Climate-controlled transportation by reefer and ambient trucks and vans
- Variety packing materials for cold products
- First-in-first-out (FIFO) / First-expiry-first-out (FEFO)
- Lot control
- Biannual / annual stock take

International Freight Forwarding

Our extensive global network guarantees speedy movement of your valuable products across all borders.

- International freight forwarding covering air, sea, land, road and multimodal
- 460+ direct air freight cities
- Express pick-up at airports
- Customs and duty management
- Carrier management
- Order management
- Freight insurance
- Shipment track and trace

Warehousing and Distribution

We deliver your products securely and in prime condition. Our extensive warehouse and distribution networks around the world ensure your products are handled and stored to the highest industry standards.

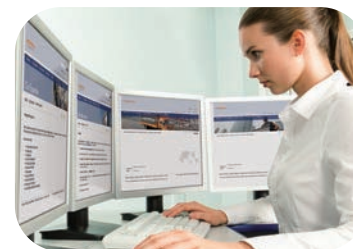

- TAPA- and GSP / GDP-certified warehouses
- World-class facility with ISO 9001 and ISO 14001 accreditations
- Humidity and temperature-controlled storage
- Inventory optimisation and management
- Distribution centre management
- Route optimisation and combined distribution solutions from long-haul, ONEX to courier
- Home drug delivery to patients
- Nationwide door-to-door delivery
- Point-to-point distribution to hospitals, clinics and medical retail outlets

Leading-Edge IT Solutions

Our state-of-the-art self-proprietary IT platform KerrierVISION provides seamless integration and guarantees full transparency and control throughout each stage of the supply chain.

- Web-based track and trace on shipment movement and inventory status
- Customised reports on product ageing by expiry dates or by deterioration
- RFID connectivity
- SMS reports

Value-Added Services

We add more to your business through offering many value-added services for your pharmaceutical and healthcare products during the last mile of the supply chain.

- Sorting and bundling
- Packaging and re-packaging
- Labelling and re-labelling for local language requirements
- Sample fulfillment
- Quality inspection
- Remote transfer of goods
- Incubator booking
- Call centre support
- Recall logistics
