

Australia

Australia is an independent Western democracy with a population of more than 20 million. It is one of the world's most urbanised countries, with about 70 per cent of the population living in the 8 largest cities. The enormous distances between Australia's cities means that effective logistics solutions are essential in delivering goods at affordable prices. The country is home to some of the world's leading supply chain experts and is regional logistics centre.

Unrivalled Integrated Logistics Player

Kerry Logistics has offices in all major Australian cities. We own and operate logistics infrastructures including a rail terminal, a container terminal, a fleet of trucks, warehousing and cold chain facilities.

Creating Visibility throughout the Supply Chains

Our KerrierVISION is a proprietary online platform designed to enhance visibility, accessibility and connectivity by enabling prompt information flow between our customers and their supply chains. It provides a customer portal to our integrated logistics customers and international freight forwarding customers to track their inventory, freight, purchase order and delivery status.
